What is the Soul ?

Our body cannot function on its own with the matter that does it. Matter cannot organize itself by itself. There is nothing in the matter that can organize it. This is what we say to ourselves when we study the body's work as a whole. So if our body cannot function on its own, there must be something that makes it living.

What makes the body working is the soul. It is not known what it is made of, how it is made. But we know that another totally different universe makes ours work. You will see this evidence in the next chapter.

Near-Death Experiences show that soul that we don't see. You'll have all eternity to see this if you're right. For now, it's about you becoming wise and free.

My Notes

Writing about another universe after watching David ELBAZ.
